CARDIMED

Funded by the European Union

Climate Adaptation and Resilience Demonstrated In the MEDiterranean region

CARDIMED aims to enhance Climate Resilience in the Mediterranean by mainstreaming Nature-based Solutions in systemic transformation. The project will demonstrate **47 different types of Nature-based Solutions** through **83 interventions across 10 regions** and **20 locations**.

Participating communities will establish the **CARDIMED Resilience Alliance**, which will function as the vehicle for expanding the network via upscaling the existing sites and adding new ones. The project expects to have **28 regions** and **70 communities in the network by 2030**, **create 8000 jobs in the NBS sector**, and **mobilize over 450 M€ in climate investment**.

CARDIMED is coordinated by the Sanitary Engineering Laboratory of NTUA and consists of 50 partners.

In September, representatives of CARDIMED consortium will meet in Athens, hosted by the municipal center Serafio in order to kick-start the project.
